SUPERMARINE CHRONO

- **Technical features:** Stainless steel Bremont Trip-Tick® case construction with scratch resistant PVD treated case barrel, bi-directional rotating laser engraved ceramic bezel, screw down crown with a pair of screw down chronograph pushers, Diameter 43mm, Metal dial with integrated dial ring, plated steel hands with Super-LumiNova®, Domed anti-reflective, scratch resistant sapphire crystal. Chronometer rated to ISO 3159 standard. 20 ATM, 200 metres
- Available in 2 dial colours (black and blue)
- Integrated blue / black Strap, Stainless Steel Bracelet

S302

- **Technical features:** Stainless steel Bremont Trip-Tick® case construction with scratch resistant DLC treated case barrel, uni-directional rotating Laser engraved ceramic bezel with Super-LumiNova®, case Diameter 40mm, Metal dial with integrated dial ring, vintage coloured indexes with Super LumiNova, nickel satin hands with Super-LumiNova®. Domed anti-reflective, scratch resistant sapphire crystal. Chronometer rated to ISO 3159 standard. 30 ATM, 300 metres.
- Sahara Vintage Leather-Side Stitch / Stone NATO canvas

ARGONAUT

- **Technical features:** Satin and polished two-piece MoD hardened stainless steel case with internal uni-directional rotating bezel with SuperLumiNova®. Case diameter 42mm. Hardened stainless steel engraved with Her Majesty's Armed Forces Heraldic Badges. 'Dirty Dozen' inspired black metal dial with custom mint colour Super-LumiNova®. Matte black, C1 Super-LumiNova® filled hands. Orange minute hand. Domed anti-reflective, scratch resistant sapphire crystal. Water resistant to 30 ATM, 300 metres. Chronometer rated to ISO 3159 standard.
- 20mm Orange Temple Island/steel bracelet

E-TYPE 60TH

- Commemorating the 60th anniversary of the Jaguar E-type.
- Box set includes: Watch, rally timer and unique driving experience.
- **Technical features:** Hardened stainless steel Bremont Trip-Tick case construction with scratch resistant DLC treated case barrel. Bi-directional rotating aluminium bezel with tachymeter timing function. Screw down crown with a pair of screw down chronograph pushers 43mm Case. 42 hour power reserve, Miniaturised Jaguar E-Type steering wheel rotor. Domed anti-reflective, scratch resistant sapphire crystal. 20 ATM, 200 metres. Chronometer rated to ISO 3159 standard.
- Available in 2 colours (green and grey)
- 22mm Green Jag Leather w/white stitch 22mm Grey Jag leather w/white stitch

RFU 150

- Dial - Colour inspired by blue tone of England's current alternative team kit and 1871 on dial indicating the year it all began. 'Twickenham' printed on dial base in homage to this great stadium, the 'home of rugby'.
- Bezel – Indicators at 35 to 40 to show match duration and then 5 more indicators in red showing any extra-time, for use in first half and end of match.
- Rose on case back – Special design using inspiration from Rose that first appeared on players' caps in 1871 and still does today.
- Hands – White with red tips , reflection of first team kit of white with red trim.
- **Technical features:** Satin and polished Steel with Uni-directional rotating ceramic bezel. Protective patented anti-shock movement mount. Automatic helium escape valve and crown protector. Case diameter 43mm. Stainless steel screw-in and decorated case back. Metal dial with applied indexes. Date window at 3h position. GMT, hour, minute & second hand fitted with Super LumiNova. Domed anti reflective, scratch resistant sapphire crystal. Water resistant to 50 ATM, 500 meters. Chronometer rated to ISO 3159 standard.

SOLO LADY K

Polished stainless steel Bremont Trip-Tick® construction with scratch resistant DLC treated case barrel. Bezel claw set with 60 white brilliant cut 1.35mm VVS FG Diamonds. Total carat weight 0.7ct, case Diameter 34mm, lug Width 16mm, case Depth 10.5mm. White mother of pearl dial, black Tahitian mother of pearl dial, with 8 applied indices containing claw set full cut 1.3mm VS2 GH Diamonds. Hands in polished nickel. Domed anti-reflective, scratch resistant sapphire crystal. 10 ATM, 100 metres. 16mm Stainless Steel, double deploying clasp, two tone adjustable bracelet. Chronometer rated to ISO 3159 standard

MB SAVANNA

- Following a decade of success of the MB range, the Bremont MB Savanna heralds an exciting new chapter for the partnership. The ability to launch a Titanium model offers a more lightweight solution for Pilots for whom weight means everything.
- This is the first time that Titanium has been introduced into the MB range on the case. Additionally, a new skeletonised rotor, also reducing weight can be seen through an open case back.
- The Dark Sand Satin-Finish in a protective, tactical coating is a choice influenced by both aesthetics and practicality. Inspired by military camo colours and the harsh Savanna environment as an homage to Bremont's military connections and heritage, whilst the satin-effect is anti-reflective ensuring it is high performance, fit for military purpose and environment.
- The Savanna mono-colour palette extends to the rubber strap – chosen for its durability and suitability for all environments.
- The new model also features the distinctive knurled effect on the aluminum barrel inspired by components on the ejection seats themselves. Equally the yellow and black loop at the end of the second hand is a direct reference to the ejection pull handle – a signature design in the MB Collection.

ALT 1 RANGE

What makes the ultimate pilots' watch? Inspired by their own love of flying, Bremont Co-founders Nick and Giles English set out to answer this question. The story of pilots and their wristwatches began when the first aviators took flight over a century ago. The ALT1 range takes inspiration from all aspects of its magnificent heritage and are lovingly engineered to be functional with finesse, whether in the hangar or heading for the clouds.

AIRCO RANGE

The AIRCO models have been named after the 'Aircraft Manufacturing Company Limited', one of the first British military aircraft manufacturers. The watches are constructed using Bremont's 40mm technical three piece 'Trip-Tick®' cases which are produced at the company's facilities in the UK, housing the smaller but beautifully finished chronometer rated BE-92AV movement.

SUPERMARINE RANGE

Just as in aviation, timing is everything for a diver.

Whether you dive for pleasure or your livelihood, Bremont offer diving watches to suit your requirements.

Our dive watches are tested from 300m all the way down to 2,000m and are worn by professionals including Royal Navy Clearance Divers.

Stainless steel cases and scratch resistant sapphire crystals ensure durability while our anti-shock movement mount protects the automatic chronometer movement. Super-LumiNova® coated dials and bezels guarantee your watch's visibility at low illumination.

Some models also include an automatic helium escape valve to protect your watch from gas buildup during ascent. Bremont are pleased to offer essential dive watches that feel equally comfortable above or below the waves.

U-2 RANGE

The Bremont U-2 was designed exclusively for, and tested extensively by, the elite Spy Plane Squadron based at Beale, California. These incredible pilots regularly take their iconic aircraft up to 80,000 feet on reconnaissance missions that often last over 12 hours. The U-2 has been put through its paces at -50°C in the laboratory and out on missions.

- Tested and designed with the U-2 Spy Plane Squadron at 100,000 feet and -50°C.
- Famously worn on Tom Hardy's wrist in the 2018 Venom movie.

SOLO RANGE

The Bremont SOLO range is inspired by the classic pilot watches from the 1940s and comes in various case sizes and dial variations. The SOLO is a beautiful chronometer and legibility played a significant role in its design. An obvious choice for anyone interested in the allure of mechanical watches, the classic Bremont Trip-Tick® case, hardened in the UK to over 2000Hv on the Vickers' scale, is over seven times more scratch resistant than typical watch-grade steel. The SOLO range also contains our new Ladies Chronometer collection, the SOLO-34.

- Ladies chronometer inspired by Lettice Curtis and Amy Johnson, 2 of the world's most recognised female pilots.

ARMED FORCES RANGE

Approved by Her Majesty's Armed Forces. Tested Beyond Endurance. Bremont is proud to partner with the Ministry of Defence (MoD) honouring Her Majesty's Armed Forces. Through this partnership, Bremont have become the sole luxury watch producer allowed to legitimately use the signs, symbols and Heraldic Badges of all three services. Incorporating the emblems of the Royal Navy, British Army and the Royal Air Force, the Armed Forces Collection draws inspiration from the original 'Dirty Dozen' watches, a series of timepieces commissioned for the British Army during World War II when Britain's Ministry of Defence needed watches to issue to military personnel.

MB RANGE

The robust nature of the MB range is not only down to the testing, but the over-engineered design of the watch. Both the movement and mechanism of the Martin-Baker have been designed to 'float' in a controlled manner within the Bremont patented Trip-Tick® case by attaching the inner case to it via a flexible ring. In doing so, shocks to the movement are minimised and shock energy absorbed. As well as this, the inner case that encloses the movement of the Bremont Martin-Baker has the function of an anti-magnetic shield. This inner case is made from soft iron and created to work as a 'Faraday-Cage' making the Bremont Martin-Baker watch immune to extreme magnetic fields, and a timepiece that has truly been 'Tested Beyond Endurance'.

JAGUAR RANGE

Jaguar first collaborated with Bremont during the launch of the cutting edge Jaguar C-X75 in 2010, for which we developed a unique, analogue dashboard clock in keeping with the 778 horsepower hybrid supercar's futuristic nature and 205 mph performance.

Bremont and Jaguar have continued their relationship following an overwhelming response to the creation of six Bremont chronometers which complement each of the six 'continuation' lightweight E-Type sports racing cars recently built by Jaguar.

The Bremont collection of Jaguar watches are dedicated to the road-going Jaguar E-Type which at its 1961 launch was not only the fastest production car in the world but, according to Enzo Ferrari, the most beautiful.

WILLIAMS RACING

Two British engineering businesses, each with its own British heritage, both based in Oxfordshire and both embarking on pivotal new chapters in 2021. As Bremont becomes Official Timing Partner to Williams Racing, the two firms will be starting a new journey together going into the 2021 Formula One season and will be looking to collaborate on a deeper technical level throughout the partnership.

Bremont's move to its new state of the art Manufacturing and Technology Centre, which marks the start of a new era for British watchmaking, is perfectly timed to enable a knowledge sharing focused around their respective CNC machining capabilities.

STRAPS & BRACELETS

- Watches have either a 20mm or 22mm lug width.
- Most watches can have any strap desired by the customer.

SPECIAL EDITIONS

BREMONT
CHRONOMETERS

MBII 10TH ANNIVERSARY

- Limited in numbers to 310 pieces
- Celebrating 10 years on from the launch of the Bremont MB range
- Martin-Baker, the British aviation company responsible for supplying over 70% of the western world's Air Forces with fighter ejection seat technology

BREMONT PROJECT POSSIBLE

- Limited in numbers to 300 pieces
- Celebrating Nirmal “Nims” Purja MBE and his amazing feat of competing Bremont Project Possible, a challenge to summit Earth’s 14 tallest mountains, all higher than 8,000m, in less than 7 months, smashing the previous record of nearly 8 years!
- Beautifully engraved rotor showing the heights of the 14 mountains in the order

BATTLE OF BRITAIN

- Limited to only 80 pieces as a box set only
- A tribute to the 80th anniversary of the Battle of Britain
- Spitfire flight experience included with the purchase of this set
- Design cues to our famous “EP120” watch from 2008

JAGUAR D-TYPE

- Inspired by the iconic Jaguar D-Type
- The watch crown has the original Dunlop tyre tread etched into it
- Limited in numbers to just 300 pieces

Ronnie Wood – The 1947 collection collaboration

We are proud to work with friend of the brand Ronnie Wood. Originally in 2011 Ronnie hand painted dials for Bremont Ship's clock. Ronnie Wood has individually hand painted 47 limited edition watch dials whilst being on tour with the Rolling Stones, a nod to the year he was born, 1947.

Each watch in the collection is a one-of-a-kind piece showcasing original art from Ronnie himself, housing a rather special Vaucher Manufacture Fleurier movement with moon phase complication, beautifully designed and engineered in a 42mm 18ct carat white gold case using Bremont's signature Trip-Tick three-piece format.

LIMITED EDITIONS

- Uniquely different and extremely limited in numbers
- The Bremont Limited Edition Collections often include significant historical materials incorporated into the watch
- Preservation of heritage and charitable angles

HAWKING

- Stainless steel, 18ct Rose Gold, 18ct White Gold in Bremont's trip-tick case construction with screw down crown.
- Case diameter: Gents 41mm, Ladies 34mm.
- Stainless steel, 18ct Rose Gold, 18ct White Gold case back with integrated flat sapphire crystal. Four screws to complement case material. A stainless steel decorative plate with black PVD and enamel, inlaid with a meteorite disc, surrounded by four wooden panels and an individual serial number laser engraved onto original Stephen Hawking manuscript paper.
- Matte black/blue metal dials with polished applied indexes and 'black hole' spiral etching. Bevelled, polished nickle/rose gold hands with white SuperLumiNova.
- Domed anti reflective, scratch resistant sapphire crystal.
- Water resistant to 10 ATM, 100m.
- Non chronometer tested.

H-4 HERCULES

- New 2019 Limited Edition
- Limited in numbers to 300 Stainless Steel, 75 Rose Gold and 75 Platinum
- Bremont's first platinum watch
- Contains original birchwood from the fuselage of the Hercules H-4 by Howard Hughes

SUPERSONIC

- Contains Bremont's first ever manual wind movement, that features an 8 day power reserve with a power reserve indicator at the 12 o'clock position
- Incorporates a ring of aluminium from Alpha Bravo, Heathrow's last remaining Concorde
- Limited in numbers to 300 Stainless Steel, 100 Rose Gold and 100 White Gold

LIMITED EDITION ARCHIVE

BREMONT
CHRONOMETERS

Codebreaker: Contain parts from Bletchley Park, responsible for breaking the enigma code and saving 2 million lives during WWII.

Victory: Contain parts from HMS Victory, which fought in the Battle of Trafalgar in 1805 and was captained by Lord Nelson.

P-51: Contain parts from 1944 p-51 Mustang and WWII veteran 'Fragile but Agile'.

EP120: Contain parts of the most famous 1942 WWII aircraft which shot down 6 German planes in one day.

LIMITED EDITION ARCHIVE: WRIGHT FLYER

- Contains fabric from the original Wright Flyer, the first aircraft to conquer the air.
- Features Bremont's proprietary BWC movement
- Was limited to 300 Stainless Steel, 100 Rose Gold and 50 White Gold

LIMITED EDITION ARCHIVE: KINGSMAN

- Bremont was selected to produce a collection of three unique custom made watches for the Kingsman: The Secret Service film.
- There was a special edition Rose Gold, DLC and Stainless steel model.
- Co-Founder Nick English even makes a cameo appearance as one of the Kingsman.

LIMITED EDITION ARCHIVE: LONGITUDE

- The Bremont Limited Edition Longitude pays tribute to Great Britain's role in clock and watchmaking, and contribution to time, astronomy and navigation.
- It has always been Bremont's ambition to bring the art of industrial high-end watchmaking back to British shores and the classic yet contemporary design of the Limited Edition Bremont Longitude marks a significant milestone in this journey.
- Not only does the Longitude house the brand's first manufactured movement from its new ENG300 movement series but it also incorporates original brass from the historic Flamsteed Meridian Line at the Royal Observatory Greenwich, London.
- At Greenwich, the brass Flamsteed Meridian line marks the historic position where the first Astronomer Royal, John Flamsteed, made his observations to discover Longitude and laid the foundations for accurate timekeeping and navigation.

BREMONT LAUNCHES THE ENG300 MOVEMENT SERIES

The 22 jewelled ENG376 movement boasts an enviable technical specification. With a depth of 4.95mm and diameter of 25.6mm, the ENG376 features a silicon escapement and a custom balance bridge and full tungsten rotor both designed to reflect the architecture of Bremont's state-of-the-art headquarters at The Wing, the home of British watchmaking. Renowned for beautifully made, yet robust and shock-proof timepieces, Bremont sought to make improvements wherever there was an opportunity to enhance the toughness of the base calibre. One notable improvement was choosing to utilise a full balance bridge, which supports the balance wheel assembly.
